Kentuckiana Curb Company - Metal over Metal Re-Roof

Re-Roofs / MR-24 Metal

Square Feet

18,000 s.f.

Project Location

2716 Grassland Drive, Louisville, KY 40299

Construction Dates

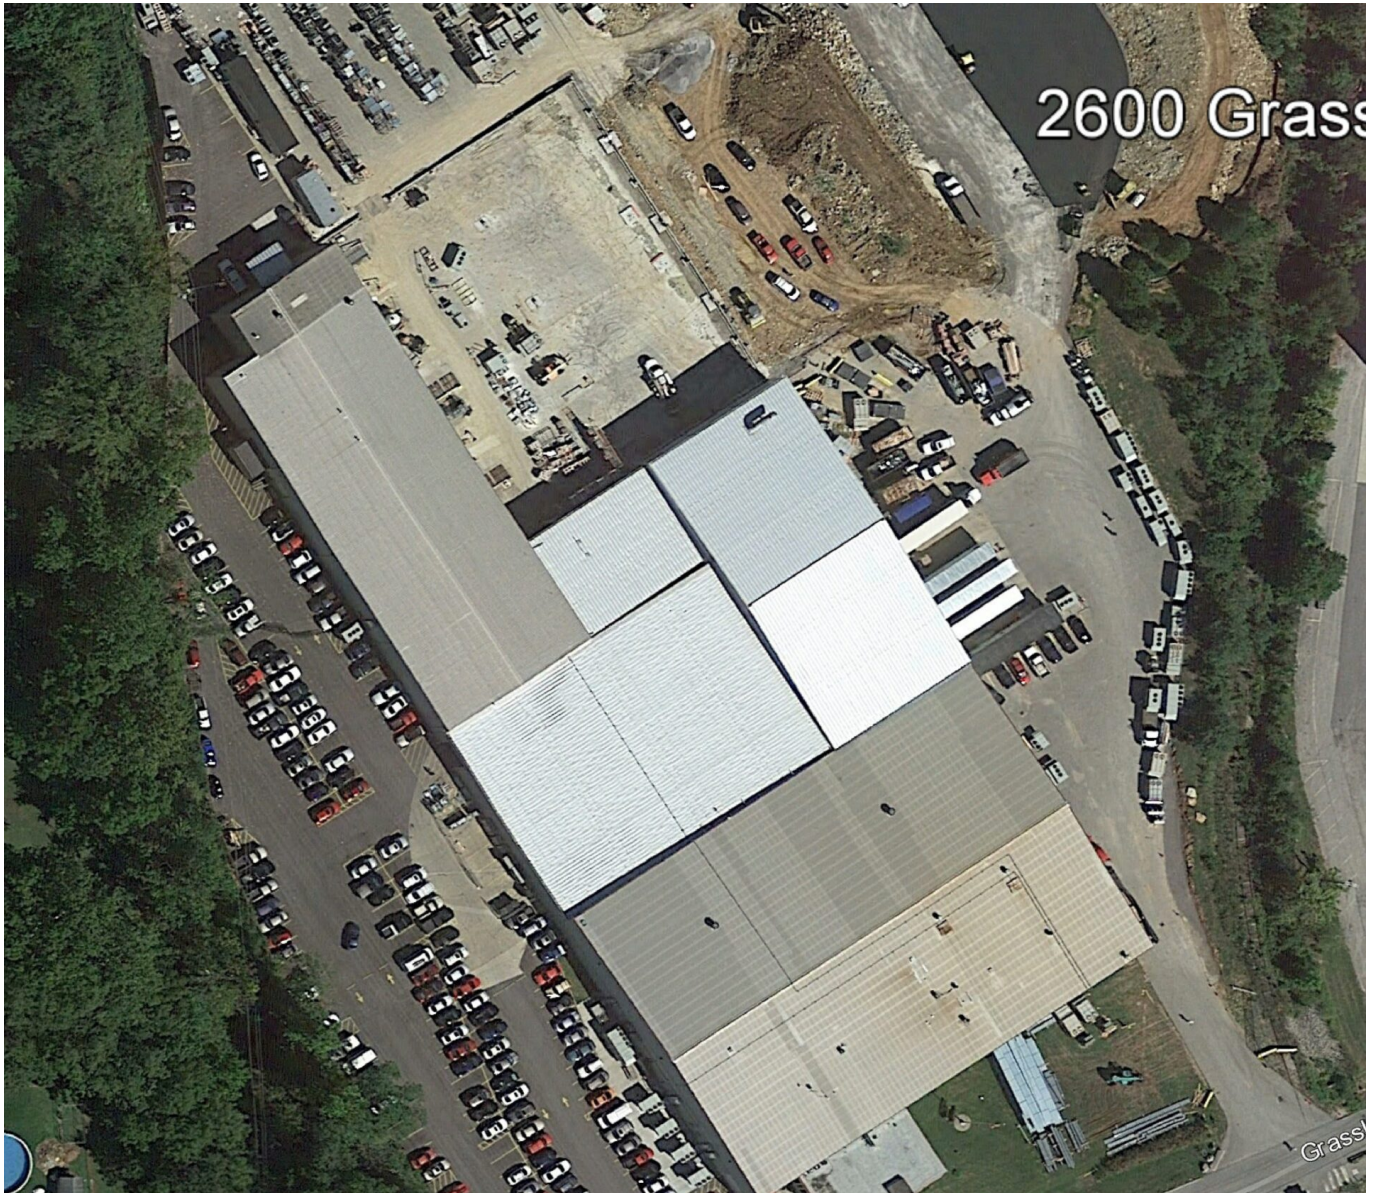

2015

End User

Manufacturing / distribution

Property Details

18,000 s.f. metal over metal re-roof to an existing metal roof system. This Butler MR-24 metal over metal application included 4" of insulation increasing the current R-value for energy efficiencies. The Butler roof system is a 24 gauge Pittsburgh double lock standing machine seamed roof system with full 360-degree mechanically turned metal seams with

Kentuckiana Curb Company - Metal over Metal Re-Roof

limited exposed fasteners. This system stands above the rest in the metal building industry and is exclusive to Butler Manufacturing, our building supplier.
