Only Butler Builders who have demonstrated total competence in design and construction are eligible for this highest-level affiliation.

Founded in 1918, Lichtefeld, Inc. has 10 employees and has been an authorized Butler Builder for eighteen (18) years. Recent projects include Harshaw Trane 50,000 sf. Louisville Ky, American synthetic rubber company, Eldorado Tire 30,000 sf. Louisville, Ky., Vogt chemical, Inc., 30,000 sf., Louisville, Ky, FMMS engineering company, 15,000 sf. Louisville, Ky., Quantum graphics, 8,000 sf. Louisville, Ky. and Dayton Freight, Louisville, Ky.

About Lichtefeld, Inc.

Lichtefeld, Inc. is a 4th generation, family-owned, design-build general contractor that develops and constructs commercial and industrial facilities in the Louisville, KY area. The construction company is dedicated to quality and honesty in meeting the needs of their customers through professional turn-key services that deliver the value their customers deserve.

Lichtefeld, Inc. is the leading Butler Manufacturing metal building representative in the Louisville regional market. They provide value engineering and construction alternatives via Butler Manufacturing's pre-engineered building systems.

As a design-build contractor, they have in house building draftsmen, and electrical/mechanical designers on staff that aid in the economical design process during early stage planning processes. With their design/build capabilities, you deal with "ONE ENTITY" to handling "ALL" of your design and construction needs. Permitting work, civil engineering work, architectural work, structural engineering, environmental engineering, electrical and mechanical design and engineering, interior design and decorating work are all part of the Lichtefeld turn-key process.

Lichtefeld, Inc also develops their own properties and leases out their commercial buildings. They take pride in sharing first-hand development experiences with their clients. You can rest assured that the Lichtefelds know construction and development. If you need financing options, leasing options, build to suit options, or market information, they have answers for you. With four Lichtefelds in office you are guaranteed to be working with an experienced owner of the company from start to finish on your project.

This 100-year-old company has a reputation for quality commercial construction and development. For many years they have served the needs in the industries of automotive, retail, schools, churches, restaurants, storage buildings, office/warehouse, recreational buildings, public services, industrial buildings, manufacturing buildings, as well as trucking facilities to name a few. Visit www.Lichtefeldinc.com and look under the projects tab to see what they build.

About Butler Manufacturing™

Lichtefeld, Inc. has been partnered with Butler for many years. Butler Manufacturing provides a comprehensive combination of design-build construction solutions and innovative building technology to the nonresidential market. Every Butler® building solution is backed by unrivaled research and testing, ensuring that Butler building systems perform to the highest standards. Through a network of more than 1,400 Butler Builder® dealers worldwide and corporate accounts services, Butler addresses the demand for environmentally friendly and energy-efficient design in community, commercial and industrial buildings.
